

## MORE WAYS TO SAVE

### Appliances

We offer rebates on ENERGY STAR® certified appliances, including:

- ✓ Room air conditioners
- ✓ Room air purifiers
- ✓ Pool pumps
- ✓ Clothes dryers
- ✓ Dehumidifiers
- ✓ Clothes washers
- ✓ Refrigerators

### Heating and Cooling

Over half your energy use likely goes toward heating and cooling your home. Energy-efficient electric or natural gas equipment can lower your costs, improve your comfort, and lessen your impact on the environment.

### Lighting

Want lights that last at least 15 times longer and use up to 90% less energy? Switch to ENERGY STAR® certified LEDs and receive instant discounts and mail-in rebates at local participating retailers.

### New Home Construction

Building a new home? It's not too early to save. By optimizing your home to ENERGY STAR® standards, you can use up to 30% less energy, lower monthly costs, and increase comfort and value.

### Energy Audits and Weatherization

Identify energy-saving opportunities with a home energy audit. Through Home Performance with ENERGY STAR®, you can receive incentives for energy efficiency upgrades, including weatherization. You will improve your comfort and could save over 20% on energy costs.

### Refrigerator Recycling

Got an old refrigerator or freezer you no longer need? Recycle it to get a \$30 rebate, save up to \$150 a year in energy costs and lessen your impact on the environment. We'll even pick it up for free.
