NEW EQUIPMENT & CONSTRUCTION 2023 Compressed Air Incentive

APPLICATION INSTRUCTIONS

Fill out Steps 1-3 and submit to your utility provider. Do not sign Steps 5-6 until instructed by your utility provider.

STEP 1 CUSTOMER INFORMATION						
Select your utility company: Deversource Deversource NH Elect	stric Co-op 🛛 Unitil	Date:				
Electric Account #:	Natural Gas Account #:					
Company Name:	Contact Person:					
Phone Number:	Contact Email:					
Installation Address:	City:	State:	Zip:			
Mailing Address:	City:	State:	Zip:			
STEP 2 CONTRACTOR INFORMATION (if self-installed leave l	blank)					
Contractor Company (if applicable):	Contact Person:					
Mailing Address:	City:	State:	Zip:			
Contact Phone:	Contact Email:					
STEP 3 PAYEE INFORMATION						
Check Payable to: Customer Contractor Other	Payment To:					
Mailing Address:	City:	State:	Zip:			
LIBERTY CUSTOMERS ONLY – Signature (for payment to Contractor,	Other):					
STEP 4 RETURN APPLICATION TO UTILITY REPRESENTATI	VE					
Send to your utility representative or email to your utility here:						
Eversource: efficiencynh@eversource.com	Liberty: nhsaves@libertyut	ilities.com				
New Hampshire Electric Co-op: solutions@nhec.com	Unitil: efficiency@unitil.com					
STEP 5 PRE APPROVAL OFFER						
STOP Once you have received Utility Pre-approval notification, sign and Program Terms and Conditions.	below accepting incentive of	offer, payment arra	ingement,			
Utility Signature:	Date:					
Amount Of Incentive:	Valid Through:					
CUSTOMER SIGNATURE:	Date:					
STEP 6 PROJECT COMPLETION						

STOP Sign below to indicate that project is completed. Send final signed application to Utility. Final Incentive calculated based on 'as-installed' conditions.

Utility Signature:	Date:
CUSTOMER SIGNATURE:	Date:
Final Project Cost:	Final Incentive Amount:

COMPRESSED AIR MEASURE INFORMATION

Table 1: Air Compressor Incentives							
Horespower	Incentive per HP Variable Speed						
= or>15 hp and <25 hp	\$200/hp						
= or>25 hp and <50 hp	\$150/hp						
=or>50 hp and <75 hp	\$100/hp						

 Table 2: Refrigerated Dryer Incentives

 Incentive per CFM Cycling & VSD Dryers
 \$5.25

Table 3: Storage Incentives Incentive per Gallon

Table 4: Zero-Loss Condensate Drain Incentives								
Incentive per Drain (limit 3 per facility)	\$125							
Table 5: Low Pressure Drop Filter Incentives								
Table 5: Low Pressure Drop Filter In	centives							
Table 5: Low Pressure Drop Filter In Incentive per Filter (limit 3 per facility)	centives \$0.80 / scfm							

Table 6: Engineered Air Nozzles							
Incentive per Nozzle: 1/8" or 1/4"	\$20 / ea						

Table 7: Compressed Air System Incentive Calculations												
Air Compressor Description (Manufacturer & Model)	Rated HP & CFM	Operating PSI	Storage Requirement (Gallons)	Existing Storage (Gallons)	New Added Storage (Gallons)	Annual Operating Hours	Incentive Dollar Per HP	Requested Incentive Dollars				
Example: ABC Company	50 HP	110	110	440	240	240	2.000					
VSD 50 HP Model: #123	220 cfm			110	110	110	110	110	440	240	240	2,000

\$2.75

Table 8: Refrigerated Dryer Incentive Calculations										
Refrigerated Dryer Manufacturer	Refrigerated Dryer Manufacturer Model Number Cycling or VSD					Incentive Dollar per CFM	Requested Incentive Dollars			
						\$5.25				

Table 9: Compressor Storage Incentive Calculations										
Air Compressor CFM	(A) Required Storage in Gallons	(B) Existing Storage in Gallons	(C) = (A-B) Additional Storage Requirement in Gallons	New Added Storage in Gallons	Incentive per Gallon	Requested Incentive Dollars				
					\$2.75					

Table 10: Zero-Loss Condensate Drain Incentive Calculations										
Manufacturer	Annual Operating Hours	Operating PSI	Inlet/Outlet Connection (inch)	Quantity of Installed Drains	Incentive per Drain	Requested Incentive Dollars				
					\$125.00					

Table 11: Low Pressure Drop Filter Incentive Calculations										
Manufacturer	Annual Operating Hours	Existing Systems PSI	Proposed System PSI	Quantity of Installed Filters	Filter Size (scfm)	Incentive per scfm	Requested Incentive Dollars			
						\$0.80				

Table 12: Engineered Nozzle Calculations										
Manufacturer	Manufacturer Quantity Type (1/8", 1/4") Annual Operating Hours Operating PSI SCFM Existing SCFM Proposed Incentive per Nozzle									
							\$20.00			
TOTAL REQUESTED INCENTIVE										

COMPRESSED AIR SURVEY DOCUMENT

The following information is to be completed by the equipment vendor in coordination with the customer. Please describe the major components of our existing facility compressor and compressed air system.

Existing Compressor (Manufacturer & Model)	Rated HP & CFM	Operating PSI	Control Type*	Existing Primary Storage (Gallons)	Operating Hours/Wk	Compressor Loading (% Rated CFM)	Original Install Date	Status After New Install**
Example: XYZ Company	50 HP	110	b.t. d	400	00	10hr @90%	4000	Descend
Model: #ABCDEF	220 cfm	110	Mod	100	90	30hr @30% 50hr @60%	1998	Removed
1.	HP							
	cfm							
2.								
3.								

*Modulating (Mod), Load/No-Load (L/NL), Variable Speed Drive (VSD), Variable Displacement (VD)

**Removed;	Backup:	Lead/L	.ad
11011101000,	Baonap,	Load, L	-~g

Note: When installing a new compressor and the existing compressor becomes lead or lag, the project will not qualify for an incentive as it will not be a single compressor system.

COMPRESSED AIR SYSTEM OPERATIONAL ISSUES

How many shifts	and how does production vary?		
What is the current system pressure at t	he furthest point from the compressor?	psi	
What is the minimum pressure required	for proper equipment operation?	_ psi	
Any significnat operational problems			
Inadequate pressure Inadequate pressure	D No		
• Moisture or air quality			
 Production problemsW due to pres 			
Other			
Compressor Cooling Medium (air or wat	ter)		
Number of Condensate Drains	Туре	Timer Style Drain Setting	
Dryer Type:			
Desiccant Refrigerant	□ None		
Dryer Capacity (CFM)			
How many gallons of storage listed above are from tank mounted compressors?			
Date of Last Leak Survey if Any			
Would you like additional compressed air efficiency services? • Compressed Air Challenge technical Training I Yes I No			
 Technical assistance with a more complex compressed air project Yes I No Leak assessment assistance Yes I No

Compressed Air New Equipment & Construction

Instructions for completing the Compressed Air Measure Information worksheet

General Notes:

- 1. A vendor proposal is required for an Incentive and must include the Compressed Air Survey Document found on page three in these instructions.
- 2. The applicable compressed air incentive section must be completed on page 2 and the Incentive must be approved prior to purchasing and installing the equipment.
- 3. Compressors under 15 HP are not eligible for Incentives.
- 4. Compressors over 75 HP are not eligible for a prescriptive Incentive but may be eligible for a Custom Incentive.
- 5. Invoices will be required for payment of Incentives.
- 6. The Incentive, in conjunction with all other sources of funding, cannot exceed the total project cost.

Eligibility Requirements:

To be eligible for incentives, the equipment must meet the following requirements:

COMPRESSORS

- Nameplate horsepower of compressors must be equal to or greater than 15 HP and less than or equal to 75HP. Compressors with manufacturers ratings only in kilowatts will be assumed to have horsepower ratings equal to Compressor kW rating (motor only) / 0.746.
- 2. Existing compressor being replaced must use modulating control. Compressors with other control methods must use the Custom Incentive process.
- 3. Prescriptive Incentives are only applicable to single compressor systems. Multiple compressor systems of any size that serve a common distribution system may submit applications as a Custom Incentive. Projects that have multiple and comprehensive measures shall be processed as a Custom Incentive.
- 4. Prescriptive Incentives are only applicable to compressors with an operating pressure of 145 psi or below. Compressors with higher operating pressures shall be processed as a Custom Incentive.
- 5. Prescriptive Incentives are only applicable to oil flooded Rotary Screw Compressors. Other compressor types may be eligible for an Incentive as a Custom Incentive project.
- 6. Compressor control shall be Variable Speed Drive (VSD).
- 7. Compressors must operate a minimum of 2000 hours a year.
- 8. Air compressors with VSDs must have as a minimum a 3% impedance series reactor in its AC power input connection.

STORAGE

- 1. Primary storage is required on all compressors receiving incentives.
- 2. Incentives are only available for air storage tank(s) in association with new compressor equipment installations.

Post-Installation:

Utility Representative must verify that:

- 1. The single compressor has been installed and operating as follows:
 - a. System operating pressure _____ psi
 - b. Original primary storage capacity _____ gallons
 - c. Additional primary storage capacity _____ gallons
 - d. Total primary storage capacity _____ gallons
 - e. Final gallons per compressor CFM
 - f. Verify compressor manufacturer, compressor model, horsepower, and rated CFM
- 2. The compressor matches the Compressed Air Measure Information. If the equipment has changed from what was approved for the initial Incentive offer, the substituted equipment specifications must be submitted and reviewed by the utility to verify compliance with technical requirements and approved before an Incentive is considered.
- 3. The invoice or proof of payment has been submitted.
- 4. The Utility Representative & Customer have signed & dated the post installation inspection block in Section 6 on the first page of the form.
