

New Home Construction

Building a new home? It's not too early to save. By building your home to ENERGY STAR[®] standards, you can use up to 30 percent less energy, lower monthly costs, and increase comfort and value.

Energy Audits and Weatherization

Identify energy-saving opportunities with a home energy audit. When you qualify for Home Energy Performance, you may receive incentives for energy efficiency upgrades, including weatherization measures such as insulation. Proper insulation may improve your comfort at home and result in savings of up to 20 percent on annual heating and cooling costs.

Refrigerator & Freezer Recycling

Your inefficient, working refrigerator or freezer may be costing you up to \$90 a year in operation costs. If you are looking to replace it or just want to get rid of a secondary unit you no longer need, you can receive a no-cost pickup, have it responsibly recycled, and receive a rebate.

Home Energy Assistance

Fuel and weatherization assistance programs are available for those who qualify.

Heat Pump Heating & Cooling

Over half your energy use likely goes toward heating and cooling your home. Heat pumps help heat *and* cool your home more efficiently by transferring heat (rather than producing it), all while lowering greenhouse gas emissions.

[NHSaves.com/heatingcooling](https://nhsaves.com/heatingcooling)

Heat Pump Water Heaters

Looking for a more efficient water heater? A heat pump water heater uses the heat that already exists in a room and pulls it into the unit to heat the water, making it up to four times more efficient than traditional electric resistance water heaters.

Gas Heating & Hot Water

Upgrade to natural gas heating equipment to reduce your energy usage. High efficiency, ENERGY STAR certified natural gas furnaces and boilers are an efficient, economical solution for water heating. Find rebates for natural gas water-heating equipment like on-demand tankless water heaters and more.
