

2025 ENERGY EFFICIENCY WORKSHOPS

For Water and Wastewater Facilities

You will learn about common energy conservation measures applicable to specific treatment technologies and energy saving ideas to take back and immediately implement at your WWTFs and DWFs. Benchmarking results will be provided for each facility. Peer-to-peer discussions will highlight successful strategies for implementation. You will also learn about the NHDES program for comprehensive energy audits and onsite one-on-one technical assistance. Each workshop will wrap up with a facility tour to highlight energy saving measures. The goals for this workshop are to:

- Understand Energy Efficiency
- Understand Energy Costs
- Operate Treatment Plant More Efficiently
- Understand Funding Options
- Develop and Present Business Case
- Get Energy Projects Implemented

Workshop will qualify for 6 TCHs/0.6 CEUs
