**Instructor:**  
**Matt Siska, P.E., CEM**

A Principal at GDS Associates with over 23 years experience in building science, Matt began as a building code consultant and has worked with GDS since 2008 on energy efficiency projects. He specializes in applying International Codes across diverse commercial buildings and offers practical insights into energy code compliance for new construction and renovations. This workshop will explore cost-effective strategies to exceed code minimums, aligned with NHSaves energy efficiency programs.
