

Save energy. Save money. Save the interest.

No-interest financing is available for Liberty business and municipal customers.

Do you want to make facility improvements that will save you energy and money? Do you have projects in mind, but need to avoid large outlays of cash and high-interest costs? The Liberty 0% Financing Program helps customers pay for eligible energy efficient projects (after incentives) with 0%-interest loans that are repaid in fixed monthly installments through their monthly Liberty electric or natural gas bills.

What kinds of projects are eligible?

Financing is available to fund many technologies. For electric customers, this includes lighting, HVAC, motors, compressed air and variable frequency drives. For natural gas customers, it includes heating and hot water systems, controls, insulation and air sealing, and most other gas-saving improvements. The project must qualify for a rebate or incentive through a Liberty NHSaves program. You may install the equipment yourself or hire a contractor to perform the work. Liberty will need to inspect the site before you remove old equipment and will perform another inspection upon project completion.

How much can I borrow?

You can borrow up to \$50,000 per project for 12 to 60 months. Loans must be used to purchase and install qualifying energy-efficient equipment.

Example	
Cost of recommended energy efficiency improvements	\$20,000
Liberty incentive (up to 35% of project cost; subject to budget availability and other caps)	\$7,000
Customer contribution	\$13,000
Monthly payment added to electric or natural gas bill (60 months)*	\$216.66
Interest Expense	\$0

This program is funded by Liberty customers and is operated according to state laws and under the regulations of the NH Department of Public Utilities. Participants must not have received a disconnect notice in the past 12 months. Some restrictions apply. Program is subject to the availability of funds and may be canceled without notice.

*Monthly payment determined by amount financed and lifetime of loan.
